SPECULA

What is Specula?

Specula is the proposed name for our new Project Management Platform. It is one place where we can see the status of our projects and daily work.

What does the name mean?

“Specula” is a Latin word meaning a lookout point: a high place where you can see everything around you.

Why this name fits

1. **One place to see everything.** Today, information is spread across many files, sheets, and messages. Specula bring it together on one screen, so you don’t have to look in several places.
2. **Problems are caught early.** The word comes from the Latin root for “to look.” The same root gives us “speculate” (to think ahead) and “spectacle” (a wide view). Seeing everything clearly helps us notice delays and opportunities before they cost us time or money.
3. **Short, clear, and serious.** The name is easy to say and remember, and it shows that this is a tool the company will rely on every day.
